Height: 25 feet

Spread: 20 feet

Sunlight: ○

Hardiness Zone: 4

Description:

Probably the hardiest pink-flowering cherry tree, with a stunning display of pink flowers in early spring before the leaves; its upright vase habit, ornamental glossy reddish-brown bark, and good fall color make this a great accent tree on the landscape

Ornamental Features:

Spring Wonder Sargent Cherry is draped in stunning clusters of fragrant pink flowers along the branches in early spring, which emerge from distinctive rose flower buds before the leaves. It has attractive dark green foliage which emerges purple in spring. The glossy oval leaves are ornamentally significant and turn an outstanding brick red in the fall. The fruits are black drupes displayed in mid summer. The smooth brick red bark adds an interesting dimension to the landscape.

Landscape Attributes:

Spring Wonder Sargent Cherry is a deciduous tree with a picturesque vase-shaped form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

Spring Wonder Sargent Cherry is recommended for the following landscape applications;

- Shade
- Accent

Email or print this page and bring it into one of our stores for availability and pricing information.

Plant Characteristics:

Spring Wonder Sargent Cherry will grow to be about 25 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution.

This is a selected variety of a species not originally from North America.
