Rejoice Flowering Crab

Malus 'Rejzam'

Height: 15 feet

Spread: 8 feet

Sunlight: ☉

Hardiness Zone: 4

Other Names: Roseybloom, Crabapple

Description:

A stunning tree with showy rose pink semi-double flowers in spring and burgundy fruit in fall; an upright, rounded habit of growth with interesting summer foliage with a burgundy cast; best used as a solitary, needs well-drained soil and full sun

Ornamental Features

Rejoice Flowering Crab is blanketed in stunning clusters of fragrant rose flowers with pink overtones along the branches in mid spring before the leaves. The fruits are showy burgundy pomes carried in abundance from early to mid fall. It has burgundy-variegated dark green foliage throughout the season. The pointy leaves turn gold in fall.

Landscape Attributes

Rejoice Flowering Crab is a deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Planting & Growing

Rejoice Flowering Crab will grow to be about 15 feet tall at maturity, with a spread of 8 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
