Bruns Weeping Spruce

Picea omorika 'Pendula Bruns'

Height: 30 feet

Spread: 6 feet

Sunlight: ○

Hardiness Zone: 4

Description:

A very unique and highly artistic evergreen tree for the landscape with strongly weeping and slightly twisted branches along a single central trunk, resulting in a very tall, spire-like form; best used as a solitary accent in the overall composition

Ornamental Features

Bruns Weeping Spruce has attractive dark green foliage with silver undersides which emerges light green in spring. The needles are highly ornamental and remain dark green throughout the winter. Neither the flowers nor the fruit are ornamentally significant. The smooth brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Bruns Weeping Spruce is an evergreen tree with a strong central leader and a rounded form and gracefully weeping branches. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance tree that will require regular care and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Bruns Weeping Spruce is recommended for the following landscape applications;

- Accent
- Vertical Accent

Planting & Growing

Bruns Weeping Spruce will grow to be about 30 feet tall at maturity, with a spread of 6 feet. It has a low canopy, and should not be planted underneath power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
