### Description:

A smaller type of hosta, forms mounds of gray-blue leaves; provides beautiful texture and contrast to other plants; pale lavender spikes of flowers in late summer

### Ornamental Features:

Hadspen Blue Hosta features dainty spikes of lavender tubular flowers rising above the foliage in late summer. Its attractive textured heart-shaped leaves remain blue in color throughout the season. The fruit is not ornamentally significant.

### Landscape Attributes:

Hadspen Blue Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance perennial, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Hadspen Blue Hosta is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover

### Plant Characteristics:

Hadspen Blue Hosta will grow to be about 12 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This perennial does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This plant can be propagated by division.

This particular variety is an interspecific hybrid.
