

Bachman's™

Growing Since 1885

Japanese Dwarf Juniper *Juniperus procumbens 'Nana'*

Height: 18 inches

Spread: 4 feet

Sunlight: ☉

Hardiness Zone: 4

Other Names: Japanese 'Nana' Juniper

Description:

A spectacular and dependable groundcover for sunny locations, low growing and mat-forming, spreads almost indefinitely, very adaptable. Also available on a standard in dwarf tree form.

Ornamental Features

Japanese Dwarf Juniper has attractive bluish-green foliage. The scale-like leaves are highly ornamental and turn plum purple in fall. It produces blue berries from late spring to late winter. The flowers are not ornamentally significant.

Landscape Attributes

Japanese Dwarf Juniper is a dense multi-stemmed evergreen shrub with a ground-hugging habit of growth. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Japanese Dwarf Juniper is recommended for the following landscape applications;

Bachman's™

Growing Since 1885

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover

Planting & Growing

Japanese Dwarf Juniper will grow to be about 18 inches tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
